Profile

- Professional sailor for the national team of Bulgaria with numerous Sportsman awards which developed in me **teamwork skills and competitive spirit** as it allowed me to work in teams of up to 8 and compete all around Europe.
- **Rational thinker**, graduated from a Math high school with an excellent Diploma, which provided me with fast and logical decision-making and data analysis. During my time at university, I got the chance to work in various groups and learn how to be a **Project manager and organize around a team**. With the business degree I gained lots of insights into Corporate governance, Economics, People Management, and many other fields.
- **Communication and presentation skills** developed while working in a 4-star hotel and a famous bar/café in Bulgaria's most popular tourist region. I have cooperated with various people and had the opportunity to satisfy the needs of different tourists of various cultures, which made me confident to perform fast, calmly, and efficiently when working directly with clients.
- **Project worker**, who can carry on multiple projects in a team environment or individually. My current work for a Bulgarian society based in Groningen, Netherlands has developed my routine around developing and maintaining a complete website while finishing my business management degree.
